Techathon

November 14, 2026

Source: techFrederick

Event image: techFrederick

Bring a mission challenge. Build a tech-enabled solution. Nonprofits get targeted technology support. Volunteers deliver real project impact. Apply now and get matched quickly. Problems in your community are real. Tech solutions can be too. Read more What is a Techathon? Techathon connects local nonprofits with technologists, volunteers, and service providers to solve real-world technology challenges. Whether your organization needs help with a website, automation, data, AI, cybersecurity, or general tech planning, Techathon is designed to help you find practical support and build lasting connections. Last year, one Frederick nonprofit turned a tech challenge into a working solution. Woman to Woman Mentoring (W2WM) came to the Techathon with a broken program-tracking system. By working alongside our team of students and professionals, W2WM was able to develop a more robust data tracking system, allowing for more efficient data capture and better data insights. In all, this resulted in more structured operations, easier onboarding and training of staff, and the ability to more efficiently apply for grants and fundraising opportunities. — 2025 Techathon Participant Get tech-enabled help for a real organizational need.
