CompTIA Cybersecurity+ Class

Monday, November 2nd – Friday, November 6, 2026 (course is five days)

Source: techFrederick

Description: CompTIA Security+ is the leading entry-level cybersecurity certification validating essential skills to secure networks, respond to incidents, and protect organizational data. This hands-on training prepares you across core domains including security concepts, risk management and governance, cryptography, identity and access management, network and cloud security, and incident response. Aligned to the current SY0-701 objectives and DoD 8570 requirements, Security+ establishes a widely recognized baseline for professionals entering the field and progressing to intermediate and advanced roles.

Guided by expert instructors and supported by practical labs and exercises, the course builds real-world competencies in monitoring, threat analysis, and implementing controls that strengthen enterprise resilience. Who Should Attend? This course is ideal for aspiring cybersecurity professionals seeking an industry-recognized baseline credential. It benefits entry-level candidates such as junior security analysts, SOC trainees, help desk and desktop support technicians transitioning into security, and network or systems administrators expanding their security responsibilities.

CompTIA Security+ Certification

Prepare for CompTIA Security+, a leading entry-level cybersecurity certification. This hands-on course covers core skills in network and cloud security, risk management, access control, cryptography, and incident response. Aligned with SY0-701 and DoD 8570 requirements, it builds practical skills for launching or advancing a cybersecurity career.

While there are no formal prerequisites, students will benefit from the following experience:

- At least 2 years of IT administration experience with a security focus
- CompTIA Network+ certification or equivalent knowledge
