FREDERICK POLICE DEPARTMENT

Frederick Police Investigating Shooting of Juvenile

2026-11-03 Source: Frederick Police Department

On November 2, 2026, at approximately 5:47 p.m., officers with the Frederick Police Department responded to the 500 block of Klineharts Alley for a report of a shooting.

Upon arrival, officers located a juvenile male suffering from a gunshot wound to the leg. The victim was transported to an area hospital, where he was treated for non-life-threatening injuries.

Based on evidence and information obtained during the investigation, detectives believe two suspects were involved in the shooting.
Preliminary investigation indicates the suspects fled the area on foot, traveling north toward North Bentz Street and West 7th Street.

Detectives are actively investigating the circumstances surrounding this incident and are asking residents and businesses in the area to check their security or surveillance systems for any video captured between approximately 5:30 p.m. and 6:00 p.m. that may assist with the investigation.

Anyone with information regarding this incident is asked to contact Detective McPeak at AMcPeak@frederickmdpolice.org or 240-578-5684. Those wishing to remain anonymous may contact the Frederick Police Department's anonymous tip line at 301-600-TIPS (8477).

Case #: 2026-069181 Incident Type: Shooting Location: 500 blk Klineharts Alley Author of Release: Lt. Jon Holler PIO Contact: Jennifer Gerlock at jgerlock@cityoffrederickmd.gov or 240-344-9886

Beyond the Prompt: Building Real Products with AI

Wednesday, November 4, 2026 **Source: techFrederick**

Location: Mount St. Mary's University, Frederick Campus – 5350 Spectrum Dr., Frederick, MD 21703
Description: You've mastered the basics of chatting with AI. Now what?
This hands-on 4-hour course teaches the Design Engineering Practice — a repeatable, tool-agnostic playbook for turning an idea into a working prototype with AI as your engineering partner.

The practice produces structured, well-documented code that a developer would be happy to inherit — so what you build becomes a real starting point for an engineering team, not a throwaway demo that has to be rebuilt from scratch.

You'll work in small groups of 3-5, choose from a curated shortlist of product concepts (or bring your own idea), and walk away with a working prototype on your laptop and a way of working you can apply Monday morning at your organization.
No coding experience required — just comfort with chat-based AI tools like Claude, Copilot, or Gemini, a laptop, and a willingness to bring your brain.
Prerequisites: Come with a login to your preferred tool, ie.

Gemma, Copilot, Claude — Instructor will use Claude for demonstration purposes.
