FREDERICK COUNTY PLANNING COMMISSION

Hyattstown storage proposal returns after earlier approval expired

2026-11-06 **Source: Frederick County Planning Commission**

A proposal for 16 self-storage buildings and an office at 1920 Urbana Pike, Maryland Route 355, is scheduled for Frederick County Planning Commission review on November 18, 2026.
The buildings would total 132,433 square feet on an 8.02-acre property.

County planning staff recommends conditional approval of the Hyattstown Self-Storage Units/Complex site plan. A previous plan received commission approval in June 2023, but that approval expired in June 2026.

The current application seeks site plan approval again.

The mostly wooded property contains a brick house proposed for removal. Vehicles would enter from Fire Tower Road, and the facility would use private well and septic service.
The report describes evergreen screening along the western boundary and earth-toned brick facades on selected buildings in response to neighbors' concerns about the previously approved plan.

The applicant also seeks permission to locate street trees elsewhere on the site because of utility easements along Maryland Route 355. Proposed approval conditions include correcting signage calculations and providing required forest conservation mitigation before applying for grading or building permits. These are staff recommendations for the upcoming meeting, rather than a new commission approval.

FREDERICK POLICE DEPARTMENT

Update: Arrests Made in Juvenile Shooting Investigation

2026-11-06 **Source: Frederick Police Department**

The Frederick Police Department is providing an update regarding the November 2, 2026, shooting in the 500 block of Klineharts Alley, during which a juvenile male sustained a gunshot wound to the leg.
The victim was treated for non-life-threatening injuries.

Through the course of the investigation, detectives identified two juvenile suspects believed to be involved in the shooting. Both suspects were taken into custody on the morning of Friday, November 6, 2026.

Juvenile complaints alleging First-Degree Assault, Second-Degree Assault, and related offenses have been referred to the Maryland Department of Juvenile Services for both suspects.

Based on information gathered during the investigation, detectives believe the individuals involved were known to one another and that the incident does not pose an ongoing threat to the general public.

The investigation remains active and ongoing. No additional information is being released at this time.

Anyone with information regarding this incident is asked to contact Detective McPeak at AMcPeak@frederickmdpolice.org or 240-578-5684. Individuals wishing to remain anonymous may contact the Frederick Police Department's anonymous tip line at 301-600-TIPS (8477).

FREDERICK COUNTY HEALTH DEPARTMENT

Stray Cat from near Woodsboro, MD Tests Positive for Rabies

2026-11-06 **Source: Frederick County Health Department**

On Friday, November 6, 2026, the Frederick County Health Department (FCHD) was notified that a stray cat found close to the intersection of Coppermine and Whiskey Springs Roads, near Woodsboro, MD, tested positive for rabies.
The cat was reported to have neurological signs on Thursday, November 5, 2026, and was picked up by Frederick County Animal Control. The rabid cat was described as a small, adult, intact male.
He was black with bright green eyes, had some white hairs, and was normally friendly.

The FCHD recommends that people who may have had contact with this cat between October 22, 2026, and November 5, 2026, consult their health care provider and notify the FCHD's Community Health Services Office at 301-600-3342.

If any pets or livestock had contact with the cat, consult with your veterinarian and notify the FCHD's Environmental Health Office at 301-600-1717.

Rabies is a viral disease that mainly infects mammals and is spread through the saliva of the infected animal, usually by a bite.
Symptoms of rabies in animals may include fear of water, excessive salivation, failure to eat or drink, limping, unusually friendly or aggressive behavior, and/or other atypical behaviors such as nocturnal animals emerging during the daytime.
The disease is nearly always fatal to humans if infected and post-exposure treatment is not obtained in a timely manner.

Barry Glotfelty, Director for FCHD's Environmental Health Services, advises, "Rabies can be prevented by avoiding contact with stray or wild animals.

Image courtesy of Frederick County Health Department.

Making sure your pets are vaccinated is another key action you can take to protect yourself and others."

If you or your pets have contact with a stray or wild animal, report it to Animal Control at 301-600-1544.

FREDERICK COUNTY HEALTH DEPARTMENT

Frederick County Health Department Announces Rural Health Projects

2026-11-06

Source: Frederick County Health Department

The Frederick County Health Department (FCHD) is pleased to announce that we are starting several new programs focusing on the health of our rural communities.

These programs are a result of federal grants received from the Maryland Department of Health that are part of the Rural Health Transformation Program (RHTP), created by H.R.
1 (Section 71401 of Public Law 119-21).

These new projects include:

Helping people live healthier lives by managing health conditions, quitting tobacco, and eating well: This project integrates Rural Health Transformation's focus on nutritional support with community health education and lifestyle change, chronic disease self-management.
Presentations about high blood pressure, diabetes, tobacco, healthy eating, and community resources are being delivered to interested groups across Frederick County.
FCHD is also delivering the "Healthy Heart Ambassador Program" for adults with high blood pressure.
Participants attend either an 8-session group program or a one-time brief education session where they receive a blood pressure monitor, training on how to self-monitor correctly, and learn what foods and other lifestyle changes support healthy blood pressure.
If you are interested in either a community presentation or learning more about "Healthy Hearts," please complete our online interest form or call 301-600-3362.

Strengthening healthy food access and community partnerships: In collaboration with University of Maryland Extension, this project is working to improve nutrition and health in rural Frederick County.
Efforts include assessing local food access, supporting community gardens and community-supported agriculture (CSA) programs, expanding nutrition education, and building partnerships that increase access to healthy foods and strengthen community health infrastructure.

Expanding access to care through mobile health services: Through the Rural Health Transformation Mobile Health Initiative, FCHD is partnering with Carroll County to expand mobile healthcare access in underserved and rural communities while investing in new strategies to identify and address barriers to care.
The project will also expand peer recovery support into Brunswick and the other rural areas of the county, increase access to vaccinations for children in school, and analyze local 911 call data to develop long-term solutions that improve health outcomes for rural residents.
Additionally, this funding will include partnering with Frederick Health to further enhance accessibility to health education throughout our county, ensuring that more rural areas of Frederick are equipped with the necessary knowledge to promote health throughout their communities.

Bringing recovery support closer to rural communities: FCHD is partnering with Frederick Health and other community partners through a Transformation Collaborative grant from the Maryland Department of Health.
This project will focus on improving access to the northern part of Frederick County.
FCHD's contribution will be to improve access to substance use and recovery needs by funding a dedicated Peer Recovery Support Specialist position in Thurmont.

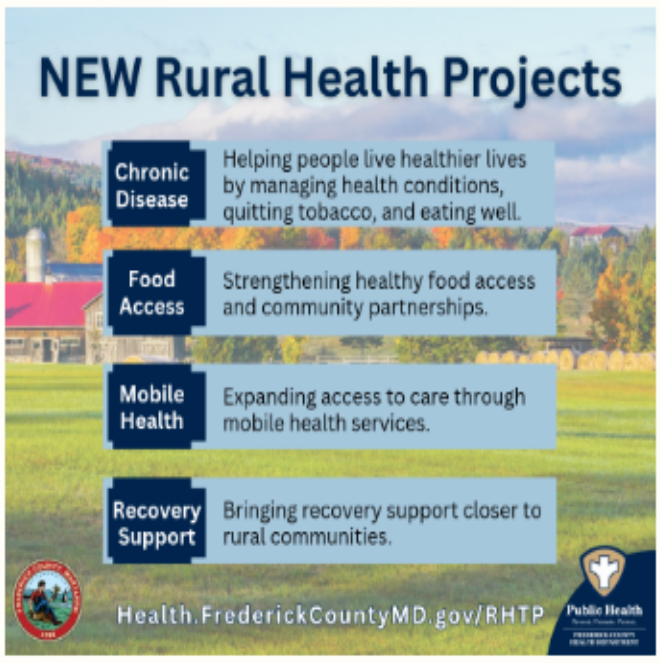

Image courtesy of Frederick County Health Department.

This initiative will provide individuals and families in northern Frederick County with greater access to recovery resources, peer support, care navigation, and connections to services close to home.

For ongoing information about these projects, visit Health.FrederickCountyMD.gov/RHTP.

Funding Acknowledgement:

The Maryland Rural Health Transformation Program is supported by the Centers for Medicare & Medicaid Services (CMS) of the U.S.
Department of Health and Human Services (HHS) as part of a financial assistance award to the Maryland Department of Health totaling $168,180,837.61 with 100 percent funded by CMS/HHS.

CITY OF FREDERICK NEWS

Prescribed Burn Planned for City Watershed Near Pine Swamp

2026-11-06 **Source: City of Frederick**

A prescribed burn is planned for the northern end of the City Watershed near Pine Swamp, off Gambrill Park Road/Right Hand Fork, between November 9 and 20, 2026.

The burn is intended to restore a roughly 90-year-old stand of pitch pine that is nearing the end of its natural life span.
It will reduce the duff layer and competing vegetation, creating conditions that support pitch pine regeneration.
Pitch pine seeds also provide a nutritious food source for wildlife, and the burn will help a new generation of seedlings take root.

Smoke will be visible on Catoctin Mountain, but the burn will use low, controlled flames. Fire personnel from the Maryland Department of Natural Resources will be on site to manage the operation.

During the burn, Gambrill Park Road/Right Hand Fork will be closed between its junction with Fishing Creek Road and Gate R6. All trails in the northeastern section of the watershed also will be closed.

The burn will take place on one day within the two-week window and will proceed only if weather and site conditions are favorable.

For more information, contact Jenny Willoughby at jwilloughby@cityoffrederick.com or City DPW Dispatch at 301-600-1440.

FREDERICK COUNTY PLANNING COMMISSION

One new home lot proposed on Retreat Road farm

2026-11-06 **Source: Frederick County Planning Commission**

A proposal to create one additional home lot on a 146-acre agricultural property along Retreat Road is headed to the Frederick County Planning Commission for review on November 18, 2026.
County planning staff recommends conditional approval of the Crum Family Homes agricultural cluster concept plan.

The request concerns a single new lot, identified as Lot 4, rather than subdivision of the entire farm into home sites.
The staff report says the applicant has chosen to propose one cluster lot and forfeit additional cluster lots available under the county's agricultural zoning provisions.

The property is used for crops and pasture, with Glade Creek along its northern boundary. Staff reports that the proposed new lot avoids flooding and wet soils in the northern portion of the property.
Access would be from Retreat Road.

The property has no planned public water or sewer service and would rely on private wells and septic systems.
Staff's proposed conditions require forest conservation plan approval before agricultural cluster plan approval, along with wells and approved septic areas before the subdivision plat is recorded.
The report presents a recommendation for the upcoming commission meeting; it does not record an approval.

FREDERICK COUNTY PLANNING COMMISSION

140, 500-square-foot manufacturing building proposed at Jefferson Tech Park

2026-11-06 **Source: Frederick County Planning Commission**

Preferred Developers LLC is seeking approval for a 140,500-square-foot building for limited manufacturing and assembly at Jefferson Tech Park. The 9.912-acre site is on the southeast side of Jefferson Station Boulevard, west of U.S.
Route 340.

The Frederick County Planning Commission is scheduled to review the Lincoln West IV proposal for Lot B-1 on November 18, 2026. County planning staff recommends conditional approval.

A site plan approved in May 2022 for a 142,478-square-foot building on the same lot expired before construction vested the approval.

The current proposal includes 167 parking spaces and 15 large loading spaces. The staff report says an end user for the building is not yet known.
Three access points are proposed along Jefferson Station Boulevard, with sidewalk and crosswalk connections.

The applicant requests flexibility in street-tree spacing because of existing infrastructure and utilities, plus permission for 18-foot lights where the usual maximum is 14 feet. The site would use public water and sewer.
Staff's recommendation depends on approval of the requested modifications and compliance with agency comments; the report does not record a commission decision on the current application.
